

TEXBAND®

The unmatched original
More than 400 million meters
for over 40 years.

TEXBAND®

Our production process makes TEXBAND® the unrivalled original

400 million metres. 40 years. One passion: The best lift tape in the world. TEXBAND® is durable and long-lasting with always the same quality – every single meter produced. This is made possible by the unique production process and the unrivalled experience of the Huber Bandfabrik: from the warping and weaving technology to the coating.

YOUR ADVANTAGES

Perfect structure, guaranteed thickness tolerance

With reliable thread monitoring, perfect thread arrangement and even thread tension, we provide the basis for a perfect tape quality.

Highest edge strength thanks to shuttle weaving technology

Edge strength is a decisive factor for a long service life. Thanks to the shuttle weaving technique, the edges of the tape are absolutely uniform and highly resistant to abrasion.

Consistent Swiss quality

Over 400 million metres produced prove the reliability. Every meter of TEXBAND® is automatically checked. Defects are repaired or cut out so that you can work worry-free.

Effective UV protection and abrasion resistance

The constant, double coating provides optimum protection against UV exposure and abrasion. It prevents the tape from becoming brittle and losing tensile strength.

Ideal stiffness, ideal folding properties

Constant and reproducible shrinkage and stretch values prevent inclined positions when raising your blinds.

Heat-setting at over 200°C ensures consistent tape properties at all times. The coated tape helps to make cutting to length, sewing the loops and threading easier.

Environmentally friendly production

TEXBAND® is produced with low energy consumption and the product is shipped on reusable spools. The unmatched durability is our guarantee for highest sustainability.

Short delivery time

We normally deliver within 24 hours after receipt of the order. This saves our customers storage space. Thanks to delivery from our subsidiary in Germany, also throughout the entire EU.

Individual support

Thanks to our many years of experience and our unique know-how, you are in the best of hands with us. We can advise you comprehensively and develop ideal solutions together.

ABRASION TEST

Thanks to the traditional shuttle weaving technique, tapes are produced with strong selvages on both sides. **TEXBAND®** is our top solution where the requirements for hard-wearing and absolutely identical edges are crucial. The unique double coating of Huber Bandfabrik protects **TEXBAND®** from environmental influences and abrasion.

In laboratory tests with edge and surface abrasion, **TEXBAND® achieves significantly higher service lives than tapes without coating.**

A **TEXBAND®** with highest edge strength thanks to shuttle weaving technique and coating

CUSTOMER OPINION

We have been working with Huber Texband for decades and rely on its high durability and consistent quality. **Huber has always been a reliable partner for our company.**

Marcel Rieder,
 Head of Strategic Procurement, Griesser AG

Our history – your proof of quality

Huber Bandfabrik has been combining tradition and innovation since 1864. As the inventor of the lift tape, we are constantly developing, even in the fourth generation. Together with our customers and thanks to our continuously modernized infrastructure, we are permanently working on our products so that they will continue to meet changing needs in the future.

The result: A wide range of technical tapes that are second to none in terms of stability, precision and quality. These are the result of our 150-year tradition of independent, long-term and entrepreneurially far-sighted action. For our international clientele, for our valued employees and for our common environment.

Our products – your solution

Blind tapes

High longevity, proven durability, consistent quality: Also with the other Huber blind tapes, you benefit from our unique production technology, which we are continuously improving:

- **HAGOLOOP®** – The dimensionally stable loop tape
- **HAGOFIX®** – The precise slat support system
- **HAGOTEX®** – The solution for interior use

Filter fabrics

For industry, medicine or environmental protection: tubular fabrics seamlessly circular woven with shuttle technology make your filters the ideal filtration solution.

Technical tapes

Customised precision tapes - shuttle or needle woven – in widths of 2-350 mm made of all weavable materials reliably meet your requirements.

We produce in an environmentally friendly way

The unmatched quality of our products ensures a long service life, the most important prerequisite for sustainability. In addition, we have already been able to save over 140 000 kg of plastic waste by using and taking back reusable spools. Our production emissions are continuously improved through cooperation with the «Energie-Agentur der Wirtschaft».
